SUMMARY

Full-stack Developer (3+ years) specializing in React, Next.js, Node.js and PHP, building responsive, accessible (WCAG-compliant) SaaS and data-driven portals. Shipped features across PropTech and media, partnering with Product/UX and engineering teams to deliver performant UIs and scalable features. Strengths in CI/CD, TDD, and Agile/Kanban; known for clean, maintainable code and measurable impact.

PROFESSIONAL EXPERIENCE

Front-end Developer, Odevo AB   *April 2023 - Present*

Tech stack: Angular, Typescript, PHP, MySQL, Docker, Git, CI/CD
- Built and iterated ERP SaaS modules for property/financial management, improving workflow efficiency by 10% for internal users.
- Developed a website builder for housing associations with editable templates; enabled 20+ associations to launch sites with no-code tooling.
- Shipped portal features for errands, finances and housing services; reduced related support tickets by 5% for internal users.

Full-stack Developer Consultant, TT News Agency AB   *Jan 2022 - Oct 2022*

Tech stack: React, Next.js, Typescript, Node.js, Express.js, PostgreSQL, Git, CI/CD
- Developed a full-stack web application to present and manage Swedish election data for end users, improving data accessibility and user engagement
- Built and maintained a relational SQL database, increasing data load speed by 10% and ensuring scalable, persistent data management

Full-stack Developer, School of Applied Technology AB   *Sep 2021 - Jan 2023*

Tech stack: JavaScript, React, Node.js, Express.js
- Completed an intensive 3-month full-stack JavaScript bootcamp, gaining expertise in modern web development frameworks and best practices
- Hired immediately post-bootcamp as a consultant to develop and launch a full-stack web application for a major Swedish news agency, providing an end-to-end solution for presenting Swedish election results.
